1. Where required, drill a suitable size hole in the mounting surface to suit the threaded tail (A) which is $\varnothing 21$.
2. Before installing the threaded tail into the wall, slide the wall plate (B) over the tail until it comes to a natural stop on the shoulder.
3. The shower bracket requires a 1/2" BSP wall outlet recessed in place (C).
4. Measure the depth required for the wall plate to finish flush with the mating wall surface. Cut the threaded tail to the required length.
