CROFT

Long Lasting Tradition

We are a family-run business that continues a long-lasting tradition of hand crafting and hand finishing the highest quality architectural hardware.

Founded in 1972 we have a long and distinguished family heritage. Our founder's grandfather first started manufacturing and selling architectural hardware items in 1868. Five generations later, we are still based in Willenhall in the West Midlands, the historic heart of the British lock and hardware industry.

Design

We design all our own products in-house and are constantly inspired by the vast collection of original patterns and dies that have been kept within our founder's family for generations. At Croft, we pride ourselves on the level of care and unparalleled attention to detail involved in making tomorrow's antiques - our long-lasting tradition.

Over the course of almost 40 years, we have acquired an unrivalled reputation for excellence. This is built on our quality craftsmanship, our ability to design and manufacture products to the very highest standards and our dedicated customer service. Today, Croft produces some of the most desirable door and window fittings available anywhere.

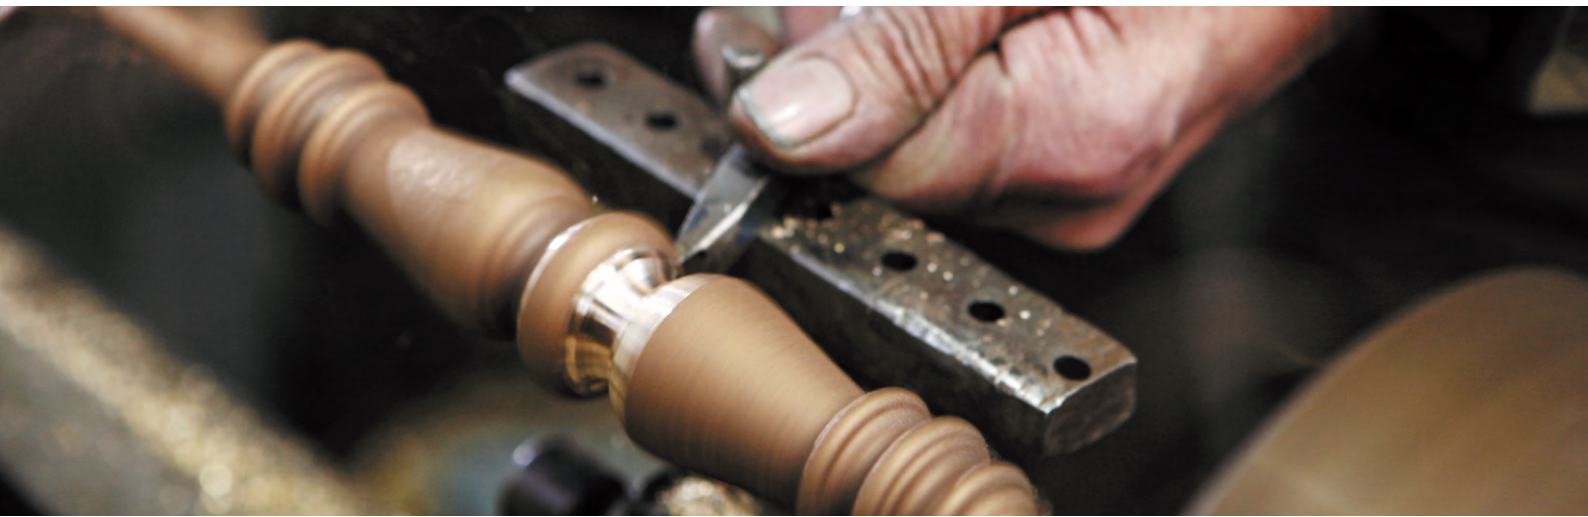

Made in Britain

We offer a comprehensive range of British manufactured products, all of which are made by hand by our highly experienced workforce. By combining traditional skills with modern manufacturing techniques, our craftsmen produce quality fittings that are built to stand the test of time.

Because each item is traditionally made and finished by hand, it is truly unique. And every item is individually quality checked at the end of our authentic manufacturing process - it doesn't leave our factory until we are totally happy with the smoothness of movement or the final finish.

Our comprehensive range of product lines are available in an exceptional choice of 23 different finishes.

We welcome bespoke orders too, and are often commissioned to manufacture specialist items to furnish stately homes, royal palaces, government buildings, castles, period, heritage and listed buildings as well as private residences.

We also export to many countries around the world, recognised for our authentic British craftsmanship by the most discerning of customers.

entrance door
fittings

First impressions count...
create the entrance you desire with Croft quality.

1 Centre Door Knobs & Pulls

Both functional and decorative, centre door knobs are generally supplied with a bolt for rear fixing through the door, and are easy to install. A dome nut is supplied to cover the bolt on the inside.

Our centre knobs can be supplied as back to back fixing if required.

2 Door Knockers

Initially used to spare the knuckles of a visitor, door knockers are now viewed as much for decoration as their intended practical purpose. Adding elegance and distinction to any doorway, they can set your house apart from others in the street.

We offer a variety of styles to suit all tastes, ranging from our contemporary 1750 to the art deco style of our 7012.

As with a centre door knob, door knockers are generally supplied with a bolt for rear fixing through the door. Again a dome nut is supplied to complete a tidy finish on the interior of the door.

3 Letter Plates & Interior Flaps

We are able to manufacture any size letter plate that you may require, special sizes are produced from 3mm thick brass. We are also able to manufacture any size interior flap to suit your needs.

4 Bell Pushes

Designed to blend with any period building, our bell pushes are wire surface mounted allowing them to be easily connected to existing wiring.

5 Cylinder Pulls

A cylinder pull is used to assist in pulling a door closed, and as decoration around the lock. Purchase to suit the type of lock on your door.

6 Numerals & Letters

Ever since an Act of Parliament in 1765 stated that all houses should be assigned a number with the street address, door numerals have been a feature at the front of properties. Our Arial Font Design numerals and letters are available in either standard screw fix, or with a pin fixing.

We also offer Escutcheons (44-45) and Security Fittings (90)

For dimensions and technical drawings on all products in this section please visit our website. Or scan here to go straight there.

door fittings

Make any door look special with Croft fittings.

1 Lever Furniture

Traditional, contemporary, or inspired from our heritage, Croft levers represent the highest quality British products. A wide range of backplates in differing sizes are offered, as well as square roses, concealed fix roses, and plates suitable for use with multi-point locking mechanisms. All our lever furniture is supplied with a spindle and fixing screws. Many designs are available with a variety of profiles to suit whichever lock you may wish to use.

2 Knob Furniture

Manufactured to our usual high standard, all Croft door knobs are available for use with either rim locks or mortice locks. Knob furniture is supplied unsprung as standard, however the knobs can be adapted to be sprung if required. All knobs and levers can be fixed dead upon request.

Spindles with our Door Furniture - Where appropriate all products are supplied with an 8mm square spindle, unless otherwise specified. Items can be adapted and supplied with a 7.6mm square spindle to suit old locks if required, please specify this when ordering.

To reduce the strain on the fixing bolts, knobs and levers can be supplied with a slotted spindle or a threaded and grooved spindle which is grub screw fixed. The threaded and grooved spindle option provides the greatest level of protection. Both the slotted and grooved spindle and threaded and grooved spindle are 4 1/2".

3 Escutcheons

A collection of covered and uncovered designs to help protect both the keyhole and the surrounding area of the door.

4 Bathroom Turn & Releases

For use with a bathroom door lock, a choice of styles to complement our range of levers and door knobs. We also have disabled bathroom thumb turns available. Bathroom turn & releases are supplied with a 5mm spindle.

5 Pull Handles

Choose from our selection of screw fix or bolt fix pull handles to create the required impression.

6 Finger Plates & Kicking Plates

Ornate or contemporary, whatever style you wish to achieve can be complimented with our finger plates and kicking plates. Many of which can be made to order in the size of your choice.

7 Locks & Latches

Manufactured by skilled locksmiths, and cast in either brass or bronze from traditional patterns. Continuing the long-standing craft of quality British locks.

8 Flush Fittings

Ideal for use on sliding and folding doors when a normal fitting would prevent complete closing or folding of the door. Also popular on marine craft. Our 2134 and 2136 do not have a finger recess and therefore are primarily for sliding doors. The 2138 does however have a finger recess.

For dimensions and technical drawings on all products in this section please visit our website. Or scan here to go straight there.

Pages 19-21 illustrate our range of backplates.

These can be used in conjunction with the
lever styles on the following pages.

If the combination that you require is not listed please contact us as we are able to manufacture any lever on any backplate as a special order.

rim furniture

These items are to be used with a rim lock, one side of the furniture is complete with a rose. The other side of the door furniture (the rim side) does not have a rose and the spindle is fixed. Please advise if your door is larger than normal so that the spindle can be made to suit.

See page 56-57 for our own range of rim locks to complete the perfect set for your door.

A white, slender vase with a bulbous base holds three vibrant red poppies. The vase sits on a dark wood surface. The background is a light-colored wall with a repeating pattern of stylized flowers and leaves in a muted green and white color scheme. The text 'interior fittings' is overlaid on the right side of the image.

interior
fittings

Continue the theme throughout with quality interior fittings, all crafted in our Willenhall factory.

See pages 2-4 for further information on our finishes.

1 Bolts

Espagnolette Bolts are a welcome addition to our range, used to secure French Doors. Turning the knob or lever extends the bolt in both directions.

Used to provide extra security, **barrel bolts** are a popular traditional choice and are available in many sizes. For a discreet bolt, a lever action flush style is fitted to the edge of the door.

Accessories including easy clean sockets, allowing a bolt to be retained and a curved recess to allow for dust to be swept clear, are also available.

2 Door Stops & Holders

A variety of styles, from wall-mounted to hooded, are on offer to help prevent damage caused by doors.

3 Hat, Coat & Wardrobe Hooks

We have a wide variety of hooks that will complement your existing style or add something a little different to any space.

4 Handrail Brackets

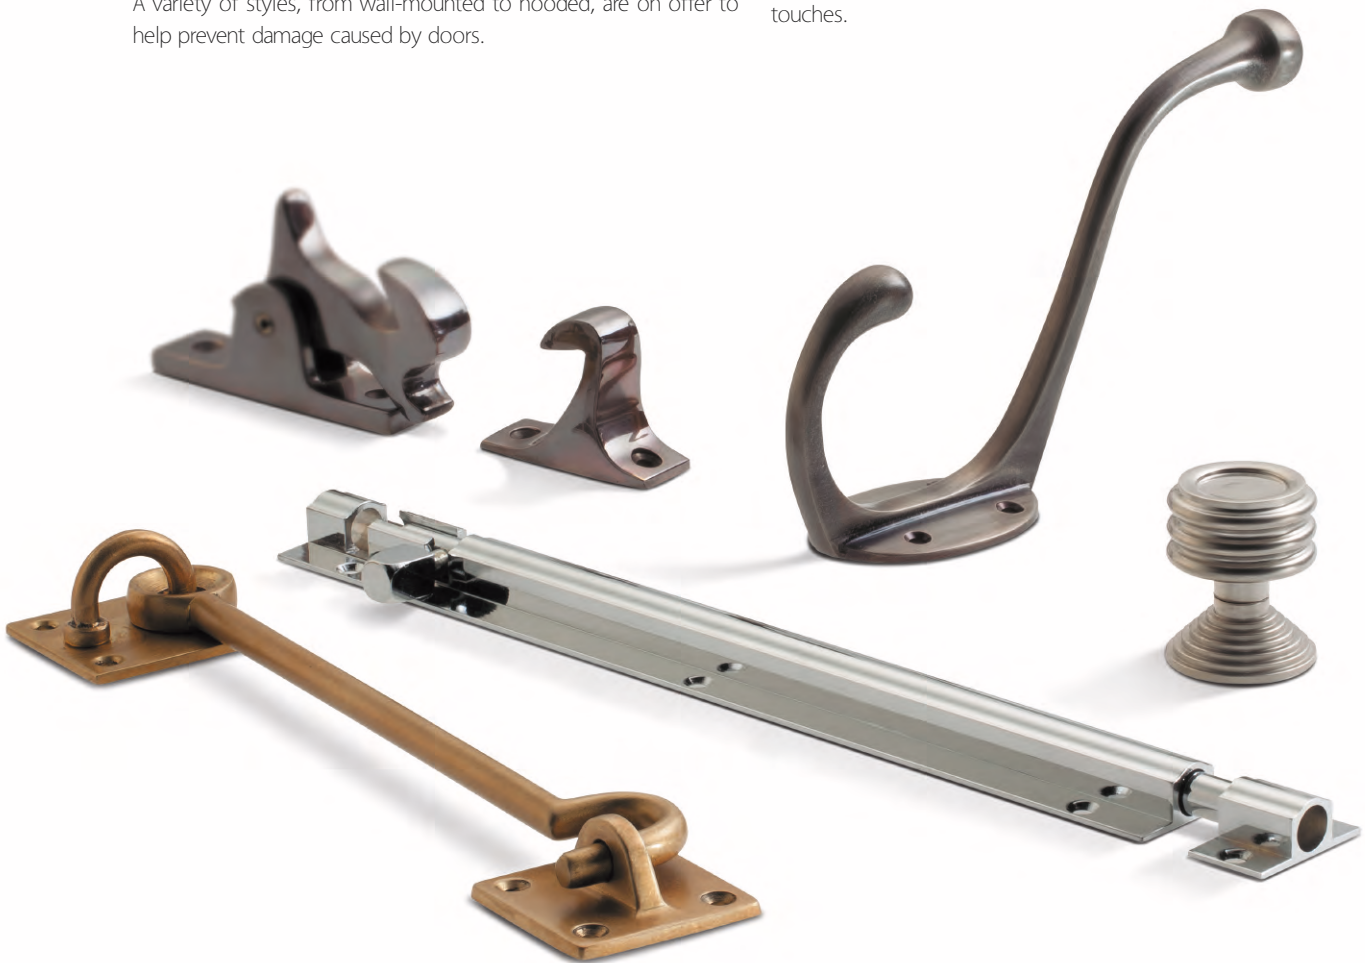

A choice of screw-fix, wall-mounted handrail brackets are available with differing projections.

5 Cabin Hooks

A hooked bar engaging into a staple, they are now used in many situations to hold a door open. Traditionally used on ships to prevent doors from swinging and banging against other woodwork. Our Cabin Hooks are available in sizes from 2" to 24" as standard, and in 3 differing styles. We are also able to manufacture other lengths upon request.

6 Cupboard Fittings

An array of choices from cabinet handles, drawer pulls, and cupboard knobs to suit all styles and tastes can be used for those finishing touches.

Window fittings

for sash & casement

Embellish your windows with our elegant and refined fittings.

Sash windows were popular from the Georgian period, and a focal point of many Victorian buildings, they consist of one or more moveable panels known as sashes.

Casement windows are hinged and set in a fixed frame. An increase in popularity during the 1930's led to them overtaking the sash style as the window of choice. Many Edwardian buildings feature both Casement and Sash windows.

Create a style that is perfect for you with flexibility of choice from our Espagnolette, Fanlight, and Shutter Fittings ranges. Our Shutter bars are made to order and we can make any size required. Our Espagnolette window fittings are supplied with a 7mm spindle.

other fittings

Our diverse range of functional fittings to complement our other products or simply to replace your existing hardware.

See pages 2-4 for further information on our finishes.

1 Fasteners

Fastening devices from counter flap catches to hasp and staples are available. A hasp and staple consists of two pieces to be fastened for a door or box to be secured by a padlock. The hinged part is called the hasp and shuts over the staple.

2 Hinges

A small range of hinges are also offered here. These cover the most common and popular types.

3 Binnacle Ring

Our binnacle ring has numerous possible uses. Traditionally used on the deck of a ship, the binnacle is a waist-high stand used to hold navigational instruments.

4 Security

For extra security see our door chains and mortice bolt thumb turn.

5 Vents

Choose from slotted, hit and miss, or louvre designs with our choice of vents.

For dimensions and technical drawings on all products in this section please visit our website. Or scan here to go straight there.

period suites

Our period styles are created to complement existing architecture and interior decor, or to create an interesting contrast amongst contemporary surroundings.

See pages 2-4 for further information on our finishes.

Our most popular period styles include:

1 Art Deco

An influential visual arts design style which first appeared in France during the 1920s, and flourished internationally during the 30s and 40s. It is an eclectic style that combines traditional craft motifs with Machine Age imagery and materials. The style is often characterized by rich colours, bold geometric shapes and lavish ornamentation.

2 Victorian

The style known as Victorian were used in construction. However, many elements of what is typically termed "Victorian" architecture did not become popular until later in Victoria's reign. The styles often included interpretations and revivals of historic designs mixed with the introduction of Middle East and Asian influences.

3 Georgian

Georgian is the name given to the set of architectural styles between 1720 and 1840. It is eponymous for the first four British monarchs of the House of Hanover who reigned in continuous succession from August 1714 to June 1830.

Proportion is key to Georgian architecture, with houses of the period following strict rules in terms of size and position of windows and doors, roof pitches and so on. As a result, many grander houses of the Georgian era have columns, classical motifs, and wide roof overhangs with shallow pitches.

Georgian architecture is responsible for many of the things we love about 'period' houses today, large sash windows, a symmetrical elevation, simple elegance of design and large ceiling heights.

If you have other heritage or period styles that you are trying to match please call us to discuss your requirements.

bespoke design & heritage

We regularly fulfil bespoke orders, and we are capable of manufacturing products to suit customer requirements.

Over the years, Croft has been commissioned to manufacture specialist items to furnish many buildings of importance, such as royal palaces, government houses, historic castles and stately homes. We also supply architectural hardware items to theatres, museums, hotels and private residences.

Whether we are asked to replicate a design to match the original as closely as possible or to design and manufacture a new item to an exact specification, our knowledge and experience of manufacturing high quality bespoke fittings using lost wax process or traditional sand casting is unparalleled.

Our products can be produced in a wide variety of finishes, to perfectly simulate or match aged patina or the period and feel of the buildings and the location in which they are to be fitted.

CROFT
Long Lasting Tradition

measurement conversion >>

common sizes

Due to the way that popular products are ordered, throughout this catalogue we have used a combination of metric and imperial measurements.

The rule opposite can be used to translate popular product sizes from millimetres to inches at a glance and is also useful to 'offer up' to existing fittings where a like for like replacement is required.

Specification Sheets

Technical drawings of all our products can be found on our website www.croft.co.uk

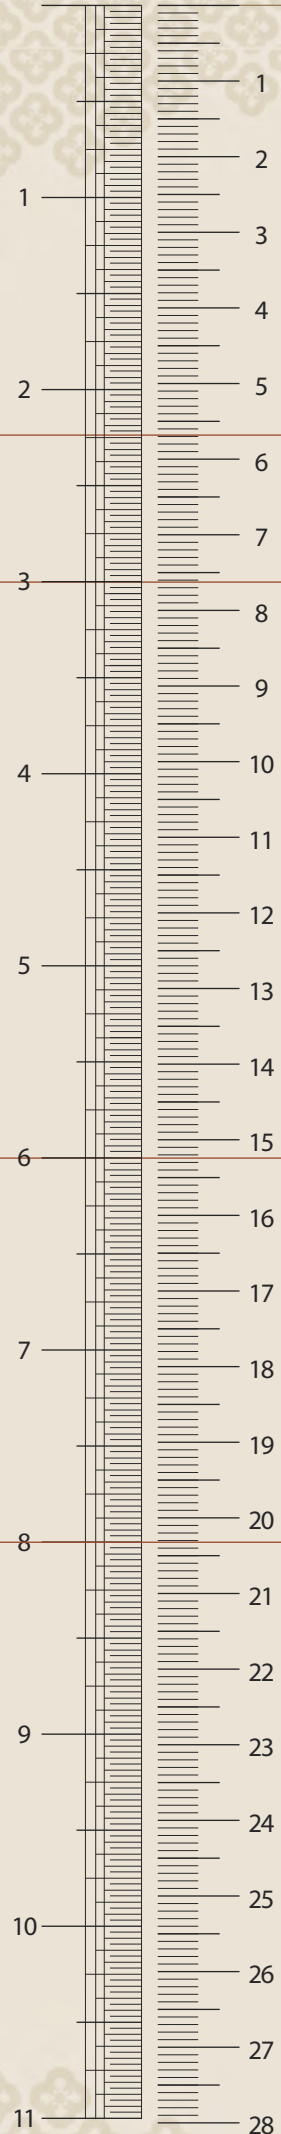

inch 1"=2.54cm cm

57mm = 2 1/4"

76mm = 3"

152mm = 6"

203mm = 8"

refurbishment

We also have the facility to offer a refurbishment service when existing ironmongery needs to be restored as near as possible to its original condition.

Purchasing Croft Products

All of our products are available to order through a network of distributors.

An Architectural Ironmonger will be able to help advise you on the most suitable Croft product for your requirements. Please contact us on the number below if you are unsure of your nearest distributor.
