Antique Brass 33037

Using our switch components, you can create any combination of plate and switch that you need.

This Antique Brass retractive switch flicks back into the top 'off' position when you let go. You can use it for things like doorbells, in-sink food waste grinders and to dim lights (with either a remote dimmer or our in-line unit).

Antique brass is what's called a 'living' finish because it reacts to the air and moisture around it, causing it to darken (especially in the areas you touch most). We've given it a head start by ageing it by hand, so it has that antique look right out the box.

 • Made from solid brass

 • Works with either our solid brass switch plates in the Antique Brass finish or our clear plates
