Antique Brass 36680

Using our switch components, you can create any combination of plate and switch that you need.

Combine this Antique Brass intermediate switch together with two-way switches on a lighting circuit that you control from three or more places.

Antique brass is what's called a 'living' finish because it reacts to the air and moisture around it, causing it to darken (especially in the areas you touch most). We've given it a head start by ageing it by hand, so it has that antique look right out the box.

• Made from solid brass

• Engineered for a satisfying click

• Works with either our solid brass switch plates in the Antique Brass finish or our clear plates
