

## Grove Single Toggle Switch

Antique Brass 30453

The switches and sockets in our Grove range can be installed with most existing back boxes, so they're ideal for retrofitting.

They offer a refined but bold look that'll make more of a statement on your walls. The front plates are precisely machined for crisp, clean edges and they're screwless (they simply clip in place).

Our single two-way toggle switch is a modern take on the classic dolly design. We've crafted it to be as sleek and timeless as possible in any interior setting.

Use a two-way switch where you want to simply turn a lighting circuit on and off. You can have either one or two of these switches on one circuit. For three or more, add an intermediate switch.

Antique brass is what's called a 'living' finish because it reacts to the air and moisture around it, causing it to darken (especially in the areas you touch most). We've given it a head start by ageing it by hand, so it has that antique look right out the box.

• Solid brass plate and toggle

• Screwless design and easy clip-on installation

• Switch mechanism engineered to give a solid, satisfying click

• Ideal for renovation projects where a standard 25mm single back box is already in situ

• Plastic chassis eliminates the need to ground the front plate

• Check our standard back box guidelines to ensure compatibility
