Grove Single Dimmer Switch

Antique Brass 33500

The switches and sockets in our Grove range can be installed with most existing back boxes, so they're ideal for retrofitting.

They offer a refined but bold look that'll make more of a statement on your walls. The front plates are precisely machined for crisp, clean edges and they're screwless (they simply clip in place).

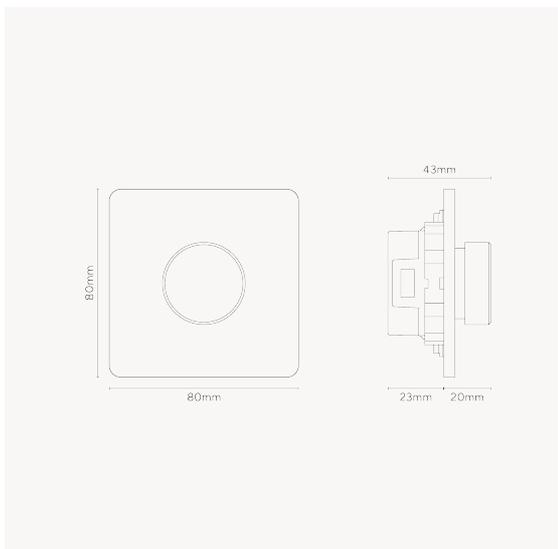

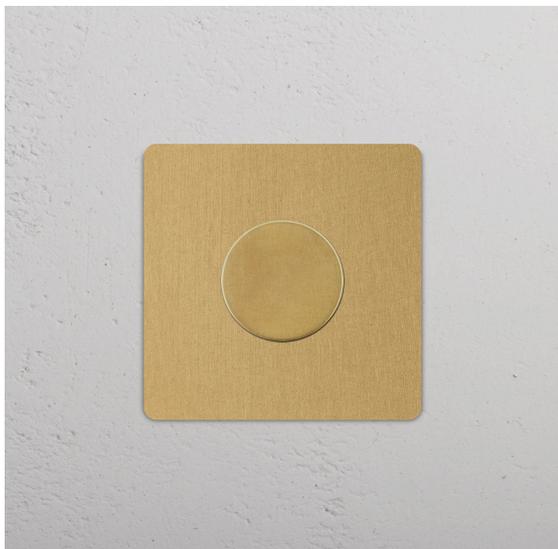

Our single two-way rotary dimmer switch is crafted to be as sleek and timeless as possible in any interior setting.

There's also a collar underneath the rotating knob to hide all the working parts.

You can have one of these two-way dimmers on a circuit alongside a two-way toggle or rocker and any number of intermediate toggles/rockers. To have multiple dimming locations on one circuit, use our multiway dimmer or in-line dimmer module.

Used with a suitable bulb, our dimmers won't flicker or buzz. You can also set the minimum bulb brightness.

Antique brass is what's called a 'living' finish because it reacts to the air and moisture around it, causing it to darken (especially in the areas you touch most). We've given it a head start by ageing it by hand, so it has that antique look right out the box.

CORSTON

ARCHITECTURAL DETAIL

• Solid brass plate and dimmer

• Screwless design and easy clip-on installation

• Anti-flickering/buzzing

• Suitable for trailing and leading edge modes

• Ideal for renovation projects where a standard 25mm single back box is already in situ

• Plastic chassis eliminates the need to ground the front plate

• Check our standard back box guidelines to ensure compatibility
