

STANDARD ALUMINIUM GUTTERS & PIPES

Composition Design & Manufacture

Gutters: Folded profiles using aluminium alloy to EN AW-6063 T4 T5 T6 BS EN 12020 – 2:2001.

Pipes: Extruded sections using aluminium alloy to EN AW-6063 T4 T5 T6 BS EN 12020 – 2:2001. Pipe collars are diecast.

Shape & Dimensions

Gutters: Supplied in standard 3.0m and 2.0m lengths.

Pipes: Supplied in standard 3.0m, 2.0m and 1.0m lengths, all complete with socket.

Standard Accessories

Gutters: 90° and 135° internal and external angles; outlet pieces with round, square or rectangular drop as required. Fascia brackets, rafter brackets and rise and fall brackets if required. Left hand and right hand stop ends; joint clips; silicone sealant; stainless steel gutter bolts.

Pipes: Shoes, one and two part top offsets, side offsets, plinth offsets, branches, bends, loose socket, square to round connectors.

Optional Accessories

Gutters: Non-standard angles or special gutter configurations made to order.

Pipes: Special bends and offsets, access plates and rodding eyes to customer requirements.

Colours & Finishes

All gutters and pipes are finished in Black textured polyester powder coating to give years of maintenance free service. Textured White and Lead Grey are also available at a small premium. Other BS5252 (inc BS4800) or RAL colours are available in smooth finish, however, if quantity allows, these can also be obtained in textured finish. A small premium is applicable for special colours.

Maintenance

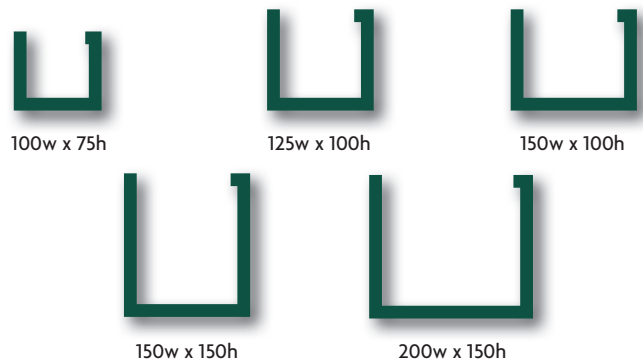

Yeoman Rainguard Standard Aluminium requires no maintenance other than periodical cleaning out.
