MADE IN ENGLAND

Introduction

Turnstyle Designs was formed in 1992 and has been designing and manufacturing unique door and furniture hardware ever since. During that time we have grown from a one man band working from a small Devon barn to one of the regions larger employers operating out of a purpose built modern factory.

All of our products are made in the UK by a team of highly skilled craftsmen and engineers, working with a broad palette of materials, from precision engineered brassware to hand stitched leather.

As well as our extensive catalogue range of products we also offer a design and manufacturing service. If you cannot find what you are looking for please contact our sales department to discuss your requirements.

Turnstyle Designs is a privately owned business; the staff are its family. We take pride in what we produce, how we look after our clients and the attention to detail that goes into every aspect of our business from production through to after sales service. Whether specifying for a client or choosing for yourself, we hope you find inspiration in the following pages.

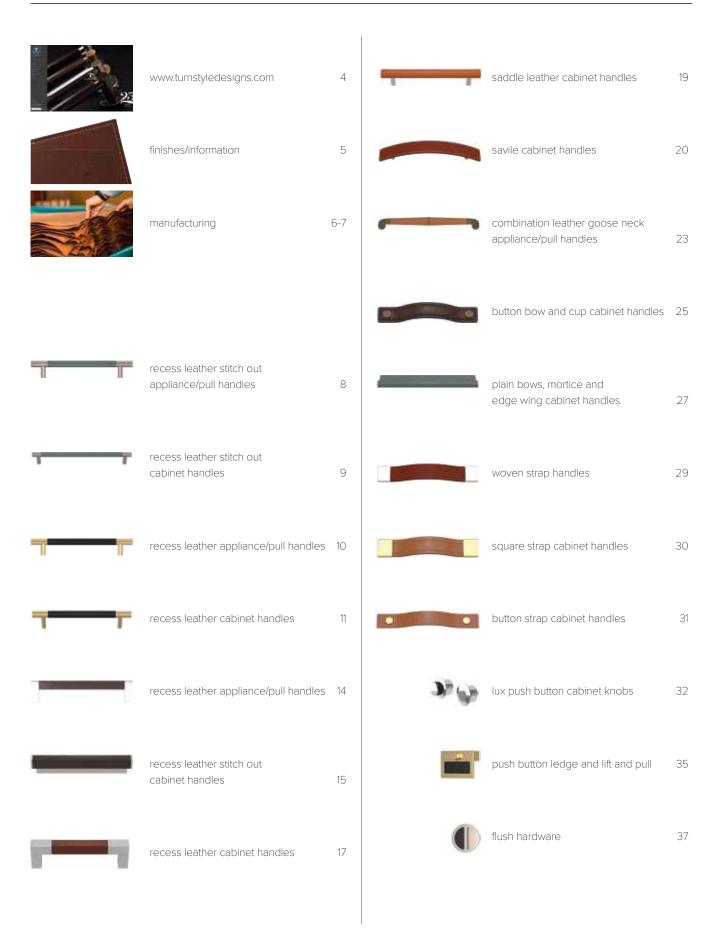

All copyright, design right and other intellectual property rights in our products and designs are and remain the property of Turnstyle Designs.

Tan (TA) Supplied with a natural thread.

Polished Brass (PU) Polished brass, pure and simple, expertly hand polished with nothing added to allow a natural

aging process. Living Finish.

Bone (BN)

SPECIAL ORDER Minimum quantities apply, smooth designs only.

Slate (GC) Supplied with a silver thread.

Brass Finishes

Fine Antique Brass (FA) Hand polished and patinated to age the brass, expertly distressed to bring out highlights and hand waxed for a durable finish. Living Finish

Sand (SA) Shagreen designs only.

white thread. SPECIAL ORDER Minimum quantities apply.

Vintage Nickel (VN) Patinated nickel, followed by hand distressing and wax

polishing. Living Finish.

Mocha (MO)

Woven Leathers

Woven Leather designs only.

Tobacco (TC)

Whisky

(WK)

Flint Grey (FG)

Raven

Black (RV)

Vintage Patina (VP)

Hand polished brass, patinated to a dark rich finish and lightly distressed for contrast. Finished with hand applied beeswax. Living Finish.

Shell Finish (Recess Shell range)

(MP)

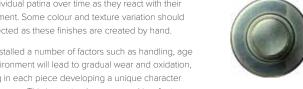

Mother of Pearl

Some of Turnstyle's brass finishes are described as 'Living Finishes'. This means they will develop their own individual patina over time as they react with their environment. Some colour and texture variation should

Once installed a number of factors such as handling, age and environment will lead to gradual wear and oxidation, resulting in each piece developing a unique character and elegance. This is a natural process and is a feature not a fault of the base material or finishing technique.

Living Finishes

be expected as these finishes are created by hand.

Hammered Brass Finishes

Burnished Brass (BH)

Developed for the hammered range, worked by hand to distress, patinated and finished with beeswax.

Burnished Nickel (NH) Labour intensive, developed

for the hammered range, polished nickel, worked by hand to distress, and finished with wax.

manufacturing

Design

For Turnstyles own extensive catalogue range of products, all design work is done in house. Conceptualised and designed by husband and wife team and owners Steve and Christina Roberts. The designs are then redrawn in CAD files, and rendered, most designs are then 3D printed to check dimensions and designs. Once approved masters will be produced for Amalfine™ casting, prototypes are then produced for market feedback before being launched and stocked.

Leather

Our leather is brought from some of the finest tanneries in the world in Tuscany, Italy. Only the very best full grained (top and strongest section), vegetable tanned (all natural), drum dyed, bridle or saddle leather. The cows are reared outdoors where the farmers do not use barbed wire, which dramatically reduces the scarring (the cows also prefer it).

Leather like all natural materials will change with age, according to the situation, exposure to sunlight and usage or lack of. The more you use it, the better it looks, the oils from your hands feed the leather and create a unique patina. Like an old handbag or briefcase the character of the leather gets richer with age.

Colour Variation

Vegetable tanning is an art rather than a science, please allow for some variations in colour from batch to batch and even from hide to hide in some cases. This is all part of the charm of using such a beautiful and natural material.

Wear and Care

As with a good handbag or pair of shoes the leather will appreciate being fed from time to time, we recommend twice a year with a natural beeswax polish, or we can supply a recommend polish if you wish.

Do not clean with solvents or chemicals, as this will not only affect the leather but also soak through and destroy the glue. Scratches and dents can be removed by a simple "boning" process that brings the oils back to the surface and repairs by simply working the leather area in circular motions with a boning tool (or the back of a spoon).

Brasswork

Turnstyle uses a host of manufacturing processes to produce the very best result for each design and product. These include CNC machining, turning, milling, forging, investment casting and extrusion. All carried out by highly skilled precision engineers.

Metal finishing

Turnstyle uses high quality solid brass for production as this is the only material that will allow us to produce such a broad pallet of plated and patinated finishes. We currently produce three stocked plated finishes and five hand patinated "living" finishes as well as many other custom finishes.

If the leather gets dirty use a small amount of soapy water, let it dry and finish with a natural wax. Try and remove dust if the handles are not being used, as dust dries out the leather.

With a small amount of care your handles will last for years and years to come.

manufacturing

Amalfine™

 $\mbox{Amalfine}^{\mbox{\tiny M}} - \mbox{ our proprietary composite blends have become one of our trademarks.}$

Incredibly versatile and durable, each piece is hand cast and finished and will pass through at least eight pairs of hands before being finally packed for dispatch. Every piece is unique with its own individually crafted character and charm.

The finishes in the Amalfine™ range are more like materials than finishes, the colour runs throughout the design so unlike a surface finish it cannot wear off. Not suitable for exterior use.

Amalfine[™] Production

Using highly flexible silicone rubber moulds we are able to reproduce finger print detail from the masters we cast from and de-mould the parts without a seam.

After de-moulding, each design is carefully machined down to remove excess material and where applicable to accurately fit its brass partner.

After around 6-8 hours of various polishing stages the beautiful lustre will remain for many years to come.

Every piece is unique with its own individually crafted character and charm.

Turnstyle also offer a Custom Casting and finishing service. For better understanding of the process visit our website and view the production movies; www.turnstyledesigns.com

Quality - 8 pairs of hands

Apart from the final quality control that every product goes through, every Turnstyle handle will go through at least eight pairs of hands during its creation and each of those pairs of hands are trained to inspect along the way. Our quality is second to none, which is why our complaints department is also our Managing Director Steve Roberts.

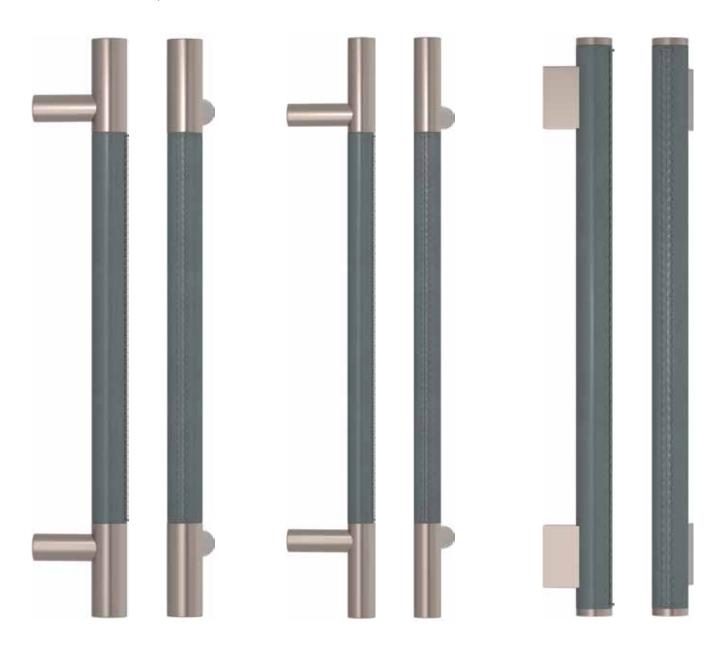

recess leather appliance/pull handles

Solid brass legs and ends with flush fitted, hand stitched and bonded vegetable tanned leather. Available in 200mm, 300mm or 400mm lengths and three diameters.

custom

As well as our extensive range of catalogue products Turnstyle Designs also offer an custom service to our clients. This falls into two key areas:

modify

Customising designs for clients by using existing stock components.

A cost effective way to enable a client to have a unique, bespoke design by using some of Turnstyles' stocked components and modifying material, grips or finish and thereby benefiting from both price and delivery times.

There are several ways of achieving this... here are the main areas:

Custom Leather

Clients can free issue their leather to apply to an existing design or modify our stitch colour or style.

Custom Grip
Create your own
grip for any of our
hardware, and
choose your own
materials and lengths.

Alongside our standard metals we have a range of custom finish options including Rose Gold, Vintage Copper and Silver Plate.

Custom Metal

Please contact our sales department to discuss any custom designs or projects

tailored

If you are not able to find something to suit your project in either our catalogue range or via the Modify process we will be happy to discuss developing and manufacturing your vision from start to finish.

With 25 years of experience, we have the capabilities and know-how to manufacture most types of door hardware, however complex, and have been the manufacturer of choice for some of the most prestigious and demanding clients in the world, including a number of Superyacht builders.

We understand the demands put on door and cabinet hardware and will ensure that your design not only looks a million dollars but it is also built to last and function smoothly.

In the first instance please contact our custom design department at our head office and ask for Alex Foster on +44 (0)1271 325 325 or email alex@turnstyledesigns.com. Alex will discuss the project, designs and suitability (to develop time scales and budget indications) from prototyping to full delivery.
